

Welcome,

Cancun, best-known for its white sand beaches, near-perfect weather, and bright blue waters, is the Acapulco of Mexico's Gulf Coast. Unlike Acapulco, however, Cancun has the modern distinction of being the only city in Mexico whose location was chosen by a computer.

In the late 60s, seeking the ideal spot to build a resort center, the Mexican government entered in factors like average temperatures, beach quality, and accessibility, and - lo and behold - the program spat out set of coordinates near the northeast tip of the Yucatan peninsula. Cancun was born.
